

2K SOLVENT BASED FACTS

PRIMER

Starpoxy™ 430/480P

Anti-Corrosive Epoxy Primer

Available with Regular (430C0035) or High Build (480C9042HB) Catalyst

Starpoxy™ 430 Fluid Resistant Epoxy Primer is a chromate free corrosion and chemical resistant primer designed for aerospace and general industrial applications. Provides excellent adhesion to aluminum, steel, galvanized, stainless, composites, and some plastics.

Starpoxy™ 480 Epoxy Primer is a tough corrosion and chemical resistant high build primer with outstanding durability designed specifically for transportation and heavy industrial applications.

Starpoxy™ 430 ZN

High Solids Low VOC Corrosion Resistant Epoxy Primer

Starpoxy™ 430 Zinc Rich Chromate-Free Epoxy Primer is a zinc flake containing corrosion resistant primer designed for heavy duty general industrial applications where excellent corrosion protection is required. Delivers over 3000 hours of corrosion protection on treated aluminum.

Starpoxy™ 440

High Solids Low VOC Corrosion Resistant Epoxy Primer

Starpoxy™ 440 High Solids Low VOC Corrosion Resistant Epoxy Primer is a chromate free corrosion and chemical resistant epoxy primer designed for general industrial applications. Provides excellent adhesion to aluminum, steel, galvanized steel, composites. Exceptional corrosion resistance and superlative adhesion to steel and aluminum compared to other primers.

Starpoxy™ 470

High Solids Low VOC Epoxy Primer

Starpoxy™ 470 High Solids Low VOC Fluid Resistant Epoxy Primer is a chromate free corrosion and chemical resistant primer designed for general industrial applications. Provides excellent adhesion to aluminum, steel, galvanized steel, composites, and some plastics. Starpoxy™ 470 High Solids Low VOC Primer is also available in Chromated, Electrostatic or Zinc Rich formulation.

TOPCOAT

Starpoxy™ 470

High Solids Low VOC Epoxy Topcoat

Starpoxy™ 470 High Solids Low VOC Epoxy Topcoat is a tough chemical resistant topcoat with outstanding durability designed specifically for heavy industrial applications. The topcoat can also be formulated as a unicoat with direct to metal application.

2K SOLVENT BASED FACTS

Starcron™ 510

Isocyanate Free Acrylic Topcoat

Starcron™ 510 is a durable two component isocyanate free alternative for acrylic urethane coatings. This product demonstrates good corrosion resistance and weather resistance as well as good adhesion on direct to many primed and unprimed metal surfaces.

Starathane™ 560F/590F

Fast Dry Acrylic Polyurethane Topcoat

Features hard, flexible, high gloss film with outstanding weather and chemical resistance. Starathane™ 560F/590F Acrylic Aliphatic Polyurethane topcoat is designed for small aircraft, transportation industry's demanding OEM specifications or where a high-performance coating is required. Hard, flexible, high gloss film with outstanding weather and chemical resistance. Starathane™ 560F is a spray formulation while Starathane™ 590F is a brush and roll formulation.
